Large Stander Hydraulic Pump INFORMATIONAL ONLY

Subject: New mower production is now using Parker Hydraulic pumps.

Units

Affected: Large Standers (48", 52" and 61") beginning with serial # 38391 and higher. **NOTE:** S/N between 38427 and 38525, have Hydro Gear pumps. You may receive a unit with HG pumps after this serial range.

Situation: To keep the Large Stander Hydro Drive System uniform, Parker Hydro Pumps are used on all current production Large Bodied Standers. Regardless of pump brand, pumps are side-specific. Please add the below part numbers to your Stander IPL 20425 and higher version.

31490024 – Parker Hydro Pump Left Side (Replaces 31490005)

31490025 – Parker Hydro Pump Right Side (Replaces 31490004)

The Fix: None – Product Improvement. Please note your IPL with the current part numbers. If unit has Hydro Gear pumps and pump replacement is necessary the Parker pump will be a direct swap. The Mower will track and operate properly with one of each pump installed. It is not necessary to replace both.

Claim

Procedure: None – information only
